

REMARKS

Responsive to the objections and rejections made of the Examiner in office action. We have amended the claims. We cancel the described of "by the stop block, the upper cambered convex corner and the lower cambered convex corner, the left upper stopper has three points to contact the middle post and lateral plate in the Y shape guide groove" This section has some problem in the described, which is pointed out by the Examiner. Thereby we cancel it from the claims 2 and 7. However it is not a clear description to the invention and it has no contribution to the structure of the invention. Thus, we cancel it from the claims. This has no effect to the content of the claims 2 and 7.

Since claims 2, 4, 6, 7, 8 and 10 are allowed in condition, thus the applicant decides to cancel Claims 1, 3, 5, and 9, without prejudice or disclaimer of the subject matter thereof, and amend the original claims 2 and 7 as the following. The claims 4, 6, 8 and 10 are remained without any change. The amendments are based the suggestions in the office action and thus no new matter is added in this amendment.

If there still is any error in the specification, claims, drawings, applicant requests and authorizes Examiner to amend the claims of the present invention so that the claim and specification can match the requirement of U. S. Patent. Attentions of Examiner to this matter is greatly appreciated.

It is now believed that the subject Patent Application has been placed in condition for allowance, and such action is respectively requested.

Respectfully submitted.
